Add these modifiers to any prompt: - **Brighter**: add "high key lighting, bright and airy" - **Moodier**: add "low key lighting, dramatic shadows" - **Warmer**: add "warm golden light, sunset tones" - **Cooler**: add "cool blue tones, daylight balanced" - **Studio**: add "professional studio strobe lighting, softbox"

Changing Backgrounds

Replace background descriptions with: - pure white background — Clean marketplace standard - light grey seamless background — Professional catalog - black background — Premium/luxury feel - natural lifestyle setting — Contextual marketing - wooden table surface — Rustic/artisanal - marble surface — High-end aesthetic

Platform-Specific Tips

Midjourney

```
[prompt text] --ar 1:1 --v 6 --style raw --q 2
```

- --v 6 — Use latest model version
- --style raw — More photographic, less artistic
- --q 2 — Maximum quality
- --no text, watermark, logo — Remove unwanted elements
- --s 100 — Lower stylization for realism

DALL-E 3 (ChatGPT)

- Remove all `--ar` , `--style raw` parameters
- Add "photorealistic, professional product photography" at the end
- Specify "no text overlays on the image"
- Request specific dimensions: "Generate as a 1024x1024 image"

Stable Diffusion

- Use realistic checkpoints: "Realistic Vision V5", "Dreamshaper XL"
- Add negative prompt: "blurry, low quality, distorted, amateur, cartoon, illustration, text, watermark"
- Settings: Steps 40-50, CFG 7-8, Sampler DPM++ 2M Karras
- Resolution: 768x768 minimum, upscale to 1024+

Adobe Firefly

- Paste prompt text directly
- Select "Photo" as content type
- Adjust style/mood sliders after generation
- Use reference images for consistent style

Pro Tips for E-Commerce

Consistency Across Listings

Use the **same prompt style** for all products in a collection. Change only the `[product]` description. This creates a unified store aesthetic.

Creating Variations

For each product, generate 5-7 images using different prompts from the same category: 1. **Hero shot** (main listing image) 2. **White background** (marketplace requirement) 3. **Lifestyle context** (shows product in use) 4. **Detail/macro** (shows quality) 5. **Scale reference** (shows size) 6. **Packaging shot** (if applicable) 7. **Collection/group** (for bundles)

Batch Processing

Group similar products and use the same prompt template. Just swap the product description. This saves time when listing multiple items.

A/B Testing

Generate 2-3 hero images per product. Upload different versions to your listing and track which gets more clicks. Most platforms (Etsy, Amazon) support this.
